Optimum Sürme Cam Balkon Sistemi, balkon, teras, veranda ve kış bahçesi gibi alanları sık ve kullanışlı bir şekilde kapatmak için tasarlanmış modern bir çözümdür.

Sistem, yatay olarak raylar üzerinde sessiz ve kolay hareket eden cam panellerden oluşur.

Paneller tek tek ya da gruplar halinde sağa ve sola toplanarak alanın tamamen açılmasına olanak tanır. Aynı şekilde kolayca kapanarak alanı dış etkenlerden korur.

The Optimum Sliding Glass Balcony System is a modern solution designed to stylishly and conveniently enclose areas such as balconies, terraces, verandas, and winter gardens. The system consists of glass panels that move silently and easily on horizontal tracks.

The panels can be moved left and right individually or in groups, allowing the area to be fully opened. They can also be easily closed, protecting the area from external factors.

Klasik Sürme Cam 8-10 mm Classic Sliding Glass (8-10mm)

Real Cam Balkon Sistemleri' nin ürünlerinden bir tanesi klasik sürme cam balkondur. 5 raydan oluşur eşikli ve eşiksiz seçeneği bulunan bir seridir. İç ve dış mekanlarda tercih edilmektedir. Sürgülü ve alttan taşımali bir sistem olan Klasik sürme seride kayar cam panellerin her yöne toplanabilme özelliği vardır. Kullanılan temperli camlar sayesinde güvenlik sağlamaktadır.

One of the products of Real Glass Balcony Systems It is a classic sliding glass balcony. The system consists of 5 rails, with thresholds and without thresholds. It is preferred indoors and outdoors. Sliding glass panels in the classic sliding series, which is a sliding and bottom carrying system, have the ability to be collected in all directions. Thanks to the tempered glass used, it provides security.
